ancaster Farming

5. NO. 15 | Lancaster, Pa., Saturday, March 5, 1960 | $2 Per Yea.

HIS IS THE WAY IT LOOKED. It probably is not news for anyone in the county, r our friends in other states who might have been enjoying sunshiny weather on day morning, this is what Lancaster County looked like But no matter what the er, farm work must go on and livestock chores must be done. Farmers, in addition ging out from under one of the worst snow storms of the season, were trying to abreast of the many cancellations of agricultural meetings and public farm sa'es. ster County Dairy Day, scheduled for all day Thursday, was cancelled, as were other meetings and all Lancaster County School. Smug members of the famed yville Ground Hog Lodge were saying, "We told you so" —LF PHOTO

Swine Show Is Success Sale Is Disappointing

Comments ranging all the way from "Sort of easy" to "Downright dissappointing," were used this week to describe the second annual market hog sale on Tuesday sponsored by the Lancaster County Swine Producers Association.

The sale of 274 market hogs, entries in the show held during the morning, brought a grand total of $8,887 but the average was only about in line with market prices for the day. The $41per hundredweight top price for the day for Grand Champion of the Show brought the sale average to $15 93 per hundredweight

Kunzler and Co. Inc , bid in the grand champion a 205 pound Hampshire barrow shown by John Stuber of Denver. The grand champion and two pen mates also won the blue ribbon for pen of three.

The reserve champion bar row, a 200 lb., Berkshire shown by Masonic Home's Farms of E-town bought by

National 4-H Week To Be Marked Here Mar. 5 - 12

About 1739 young people in this year will join in observing national 4-H Club week from March 5 to 12.

The local youth, 10 to 21 years of age, are among the 2¼ million 4-H'ers of America who belong to some 93,000 clubs in rural, urban and suburban communities. Pennsylvania has 47,000; Lancaster County had 1739 enrolled during the year.

What 4-H Club Members Do: 4-H'ers carry on multi-varied projects in farming, homemaking, community service, and other activities. They raise livestock and poultry, grow gardens and field crops, conserve the soil sew, cook, preserve food, and improve their homes in rural and non-rural areas. They apply the latest researrch in home economics, agriculture, and other areas—and learn the "why's" as well as "hows" of what they do. For a well-rounded life, they enjoy play and recrea-

Conservation District Members Hear U. Of Delaware Dean

"Use of water has q adrupled in the past 50 years and is likely to double again by 1975." soil conservation district cooperators and their families were told at the annual meeting and banquet of the Lancaster County District on Wednesday night.

Dr. George M. Worrilow, Dean and Director of the school of Agriculture at the University of Delaware, speaking on the subject, "Why we are running out of water,' blamed the urbanization of our rural areas for the fact that water tables in some areas of the eastern United States have dropped as much as 40 feet.

Dr. Worrilow went on to say that urbanization is only one of the reasons for the apparent shortage of water.

"There are those who th-

Trading Slow but Prices Up

James E. O'Hara,
In Charge, Market News Branch

Cattle· Receipts will total about 500 head more than last week's 3740 head count Supply includes about 45 per cent slaughter steers and about 25 per cent stockers and feeders. Trading was slow with inclement weather late in the week retarding trading.

Compared with last week's close, slaughter steers 50 higher Cows and bulls held about steady. Stockers and feeding strong.

Bulk of choice grade slaughter steers weighing up to 1400 lbs brought 26 75 - 28 50, several loads and lots high choice and prime 1200-1220 lbs made 28 75-29 25 Load and lot mostly prime 1155-1350 lbs sold at 30 00 Good to low choice brought 24 50-27 Few lots good and choice heifers made 22 25-26

Cutter and utility cows made 15 75-18, commercial cows were up to 18 75, canners and low cutters, 14-15 75 Utility and commercial bulls brought 20-23 50 and good grade fed bulls were up to 26.

Good and choice 800-1050 lb. feeder steers made 24 50-27 50, medium and good 21-50-25 50 Good and choice 500-800 lb stock steers sold at 25 50-29 Med and good, 22 50-26. Good and choice stock calves brought 27.50-32 00.

Calves: Trading was moderately active on about 750 head or about 50 head more than last week. Vealers were 1-2 lower. Good and choice vealers ranged from 29-37 with choice and prime selling at 37-41 with a few earlier in the week at 42 and 43, standard and low good made 21-29 with utility selling down to 17.

Hogs· Receipts will total about 1850 head or about 100 more than last week. Trading was moderately active Barrows and gilts were 50 higher, sows 1 higher. U S 1-3 grade 190-230 lb. barrows and gilts brought 15 25-16, with hogs more uniform for wgt and grade including 1-2 grade 190-220 lbs made 16 25-17. a few lot mostly no 1's 195-220 lbs brought 17 25-17 50. No 3's were down to 15. 230-250 lb butchers made 15-15 50 300 - 600 lb sows brought 9-12 with a few up to 13

Sheep Receipts will total about 225 head compared with last week's 409 head total Trading was moderately active Wooled slaughter lambs held steady Good and choice 75-105 lb slaughter lambs brought 19 50-22 75, several lots 80-95 lbs at 23, while utility sold down to 15 50 Two lots choice grade 68-78 lb spring lambs made 25-26.

Chicago Cattle Prices Continue To Increase

Cattle — Local receipts 4 per cent over last week when supply was smallest since August excluding Christmas week.

Consist of receipts altered slightly with percentage steers increased from 72 to about 75 per cent while per centage heifers declined from 18 to about 15 per cent. Vealers and stockers and feeders continued scarce.

Percentages of various grades in slaughter steer supply little changed with about 9 per cent prime, 55 per cent choice, and 30 per cent good.

Average weight of slaughter steers increased from 1164 lbs to estimated 1168 lbs. Continued very moderate receipts both locally and in the aggregate together with the bullish influence of 1 00-1 50 higher

Choice and prime steers 50-1 25 higher, good and below unevenly steady to 50 higher, Heifers steady to 50 higher with choice and prime at most advance Cows and bulls 25 to 50 higher, vealers steady to 1 higher, stockers and feeders 50, instances 1 higher.

Bulk mostly prime 1200-1365 lb slaughter steers 30-31 25 mostly 30 75-31 at the close with one load 31 25, load prime 1325 lbs 32 50 Wed highest here since July Mixed choice and prime steers 1075-1450 lbs 28 75-30 - 50 mostly 29 25-30 50 at the close.

Bulk choice steers 26 50-29, largely 27-29 late Most good steers 23 50-26 75 Utility and standard 18 50-24

Few choice vealers 32 - 34, good 30-32, standard 23-30, good and choice 835 - 1000 lb feeding steers 24 50 -26.35, good 750-825 lbs. 25-26 25. Few good 425 lb stock steer calves 25 50

New Holland

Snow Curtails Receipts

The snow curtailed recipts at the New Holland beef market on Thursday Only 494 head of cattle and 89 calves were in the run Quality was not as good as the previous week.

Trading was active. Compared to last week's close slaughter steers were strong to 50 higher. Bulls and cows sold steady.

Bulk of the Choice slaughter steers up to 1400 lbs. made $27 50 to 29 50. Few lots of high Choice & Prime 1,000 to 1,340 lb. weights went to 29.50 to 30.40 Good to low Choice were 24 25 to 28. A few Standard sold down to 22.

Good and Choice heifers made 22 50 to 26. Standards down to 19.

Utility and commercial bulls commanded 20.50 - 24, Good grade fed bulls up to 26

Cutter and Utility cows made 16-18.75, Canners and low Cutters 14 to 16.25

Stockers and feeders were absent

Calves were unevenly steady to 1 00 lower Good and Choice vealers - 29 to 37. Odd head prime to 41.00 Standard and low Good made 22 to 29 Utility was down to 15.

The March 2 dairy cattle sale had receipts of 115 cows. nine bulls and 21 heifers. Top fresh cows sold steady All other kinds were slow and $20 per head lower

Fresh cows, Holsteins - $350-440, Guernseys - 360, others - 210-325

Stock bulls - $85-215, heifers - 75-140.

The February 29th sale had receipts of 300 The market was very a on all kinds and steady

Mules, pair - $290-660, gle - 125-215 Ponies - 130

Riding horses - $12 driving horses - 140 300, lers - 10 cents

CONSIDER MOISTURE

When selecting a su surface floor covering concrete laid directly o earth, below grade ment), or at grade (gr level), consider moisture alkali, advises Sanna P Penn State home ma ment extension specialis nyl asbestos tile and as tile are resistant to moi and alkali and are choices for concrete laid on the earth. Some ufacturers sell a rubber all-vinyl floor covering w they recommend using special adhesive for con floor at grade

Delmarva - Georgia

Price Rises On Curtailed Supply

Delmarva reported prices ranging from 18 80 to 20.70 on 476,800 head at the farm during the 24 hour period ending 10.30 Friday morning.

Estimated slaughter for the week end by Delmarva processors was 370,000 head compared to the 610,000 head of last week end.

Price was effected somewhat by the weather which forced closing of some of the processing plants Movement of poultry was very limited

The Delmarva broiler - feed ratio for the week ending February 26 was unchanged at 4 0 Six months ago the ratio was 3 4, and for the same week last yr. the ratio was 3 5 For the week ending February 26, broilers averaged 18 62 and mash cost $92 20 per ton.

Georgia reported prices ranging from 17 to 18 75 on 766 000 head at farms for the 24 hour period ending 10·30 Friday morning

Two per cent were at 17, 51 per cent at 18 and 11 per cent at 18 5 to 18 75

Estimated slaughter for the week end by Georgia processors was 1,103 000 head compared to 1 498.000 head last week end.

SPRING IN WINTERTIME

A breath of spring can be introduced in the home by forcing into bloom some branches of flowering shrubs, reminds Mrs Lynn Smith, Penn State extension floriculturist. Among them are forsythia pussy willows, flowering quince, and red-bud

FROM WHERE WE STAND -

Beware The Ides Of March

Kite flying time is here again. It is one of the oldest and best juvenile diversions, but it appears there have been quite a few changes in this venerable and respected pastime.

Consider this list of "Don'ts" for kite flyers printed recently by a gas and electric company in San Francisco. With the possible exception of one of the eight rules, Grandpappy, or even Pop, in his childhood days would not have needed any one of these rules which are very worthwhile today.

Here are the rules as listed: 1. Don't fly a kite with a metal frame or tail. 2. Don't use tinsel-string, wire or twine that has any metal in it. 3. Don't fly a kite near electric power lines. 4. Don't fly a kite over radio or TV aerials. 5. Never pull on a string or climb a power pole to loosen a snagged kite. 6. Don't touch fallen electric wires. 7. Don't run across the streets or highways while flying kites. 8. Don't fly a kite in the rain.

We believe these are good safety rules for rural as well as urban children before they try their hands at the ancient skill.

We can't help remembering, though, one of our favorite kites from quite a few years back. As many of you will remember, you couldn't go to the corner store and purchase a ready cut kite including string, frame and paper. If you wanted a kite, you made one out of whatever materials were at hand.

This favorite kite was a really big one made on an umbrella-stave frame and covered with wrapping paper. We didn't have a string strong enough to stand the pressure, but we did find some fine wire that would do the trick. It took the combined efforts of three small brothers to launch the mammoth thing, but finally it was airborn and we tied the wire to a fence post.

A gust of wind snapped the wire and our precious behemoth was last seen wobbling out over the woods toward the river.

Probably it was a blessing that the thing did get away considering the rules laid down by the power company, but in our back pasture, the nearest power lines were almost a mile away. The nearest highway was an equal distance; the only radio aerial within miles was strung between the corner of our house and the chicken coop just slightly more than head high, and the only TV antennas were about 15 years in the future. The season of thunder storms was several months away, but if we could have kept our giant on its leash, we would have had it until mid summer.

Anywhay, the rules for kite safety in this day are worthy of note. Perhaps this is what the poet meant when he said, 'Beware the ides of March."

At least that's how it looks from where we stand.

Davidson

THIS WEEK

—In Washington

With Clinton Davidson

The Big Question

The answers are in now on a questionnaire which Senator Allen Ellender, Chairman of the Senate Agriculture Committee, sent the U S. Department of Agriculture and a group of Land Grant College economists last fall

The question he asked was: What would be the effect on farm production, prices and income if government production controls were eliminated and price supports lowered to the free market level over the next five years?

This has been the nub of the debate over farm programs and policies for the the past several years, Secretary of Agriculture Exra Taft Benson has favored lower supports while Congress has refused to agree to as great a reduction as the secretary wants

During the past seven years price supports have been reduced an average of 25 percent Farm production has increased 15 per cent, prices have gone down 28 per cent and net income down 23 percent On the other hand, farm program costs have gone up by more than 500 per cent and CCC holdings have increased 1,000 per cent

Government Out of Farming

Mr Benson has pleaded with Congress to "get the government out of farming" and to restore to farmers "the right to make their own production decisions based on sound farming practices and market demand"

There is unanimous agreement that present production control and price support programs are both costly and ineffective Controls have not reduced production and supports have not maintained farm income

Department of Agriculture expenditures have increased from less than $1 1 billion in 1952-53 to $5.7 billion this fiscal year. The USDA inventory of surplus commodities have increased from $1 billion in 1953 to $10 billion.

The average of prices received by farmers has declined from 94 per cent in 1953 to 77 per cent of parity. Net farm income has gone down from $14 4 billion to about $11 5 billion last year Farmers are almost $10 billion deeper into debt than they were seven years ago.

Difference of Opinion

There is no argument over the figures They're a matter of record But there is a wide difference of opinion both over what caused the present farm situation, as, well as over what should be done to reverse the trend

Mr. Benson wants production controls discontinued on all crops, as they were last year on corn. Those who oppose this point to the 15 percent increase in corn acreage and 500 million bushel addition to surpluses in 1959 to back up their arguments

Benson counters by citing what has happened in potatoes and milk, for example, on which farmers were free to make their own production decisions. These two commodities, formerly in large surplus supply, both now are in balance with demand

The only farm surpluses of any consequence, Mr Benson points out, are those on which there are both production controls and price supports. He backs this up by pointing out that livestock growers have fared very well without either supports or production controls.

Sen Ellender, however, wanted the "expert opinion" of leading farm economists, with no political ax to grind on what would happen by 1965 if controls and price supports were dropped.

(Editor's note: Their answers will be reported next week in the second of two columns on the farm debate)

USDA Reports

May-June Poults Best

May and June are the best months for hatching turkey poults, according to Penn State studies of body weight and per rent of grade A birds E. G. Buss, poultry researcher at Penn State, reported these findings at a recent meeting of the Turkey Division of the State Poultry Federation

Dr. Buss discussed experiments by Paul H Margolf which showed consistently high percentages of grade A carcasses among turkeys hatched in May and June.

"January - hatched poults gave the poorest performance for body weight and per cent of grade A carcasses," Dr Buss said

An August hatch showed the best feather condition and the least dressing loss from live to drawn weight.

Additional studies must be made to distinguish between the effects of temperature and light on growth and other traits, Dr Buss pointed out.

SPRING IS COMING

By C. D. H.

Winter comes and winter goes,
But spring will always be
Just waiting for the warming sun
To burst on every tree.

On cold and wintery days we should
Recall these words to mind,
The poet said, "When winter comes
"Spring isn't far behind."

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY DR. KENNETH J. FOREMAN

Bible Material: Acts 22.30 through 23.35.
Devotional Reading: Psalm 121.

Providence

Lesson for March 6, 1960

"GOD WILL take care of you" is the name of a popular song, and is a popular idea. But some of the bitterest experiences of life come when a person discovers that this sentence does not mean quite, or perhaps at all, what he thought it did. The name given in the church to the truth that God watches over us and all things and all men, is "Providence." In fact all that God does, in relation to mankind, and to his universe, is summed up in two words, **Creation and Providence.**

Dr. Foreman

But the current lesson from the Bible, part of the story of Paul, may help to untangle the truth about Providence, God's care for his creatures, from some wrong ideas about it.

Will God Keep Me From All Harm?

We sometimes say that God will keep us from all harm; but if we stop to think about it, if we see how God has acted in times past and what the experiences of Christians have been, we shall realize that to say that God will keep me from all harm is saying more than the facts will support.

God will not keep you from dying. He has not kept many of his children from death. Even his only Son Jesus Christ actually died on Calvary. We sometimes think a man is peculiar if he keeps a coffin in his house for future use; but while it may be unusual to do that, it isn't crazy. Unless you die at sea, or get vaporized by an H-bomb, or something extraordinary like that, you may as well buy your casket now. What is left of you will need a coffin of some kind. This is true no matter how good you are.

God will probably not keep you from all suffering. Even if you never have an ache or a pain in your body, even if [illegible] with all your teeth as [illegible] even if your friends a[illegible] so that you never ha[illegible] their deaths—if you [illegible] at all, if you share [illegible] Christ, you will be to[illegible] passion, as he was, by [illegible] of the millions witho[illegible] The more Christian [illegible] more the sorrows of [illegible] weigh on you.

From Final Evil

What God will keep [illegible] what we might call [illegible] we think over the li[illegible] Christians and saints [illegible] what God's Providen[illegible] their lives. Take Pa[illegible] example. There at Je[illegible] did not save him fro[illegible] killed, though he did s[illegible] being killed. He saw [illegible] being scourged, but he [illegible] him from being a pr[illegible] is always a worse so[illegible] which God spares us[illegible]

And what is the wo[illegible] is this: that a man [illegible] hopelessly and finally [illegible] Creator and Father [illegible] suffering may keep us [illegible] God; but no darkne[illegible] us from knowing tha[illegible] The Christian may h[illegible] in the valley of the sha[illegible] —and what greater [illegible] there? There is one g[illegible] ness than this, the hi[illegible] which man has lost [illegible] But this does not com[illegible] of faith. Paul more [illegible] thought he was going [illegible] finally was killed; but [illegible] God.

Is God My Bodyguard?

When the President [illegible] States goes on a trip [illegible] few blocks, he does not [illegible] his personal safety [illegible] Service men do the w[illegible] him. As his bodyguard [illegible] responsibility to see th[illegible] comes to him. He can[illegible] but he is surrounded by [illegible] sides.

Is God my bodyguar[illegible] take all responsibility [illegible] sonal safety? Can I h[illegible] worrying to him? We c[illegible] worrying to him, yes, [illegible] a personal responsibil[illegible] can say that God kept [illegible] the agony and danger [illegible] scourging; but how? I [illegible] not spoken up when [illegible] told the officer that [illegible] Roman citizen, he would [illegible] scourged anyway. God [illegible] works best when we act [illegible] ship with him.

(Based on outlines co[illegible] the Division of Christian [illegible] National Council of the [illegible] Christ in the U. S. A. [illegible] Community Press Service.

Now Is The Time . . .

BY MAX SMITH

MAX SMITH

TO PROVIDE SPECIAL LIVEST[illegible] CARE—Spring is the time of the [illegible] that many pigs and lambs are bor[illegible] cold weather many of these infants [illegible] get a poor start unless the caretaker [illegible] hand to provide warmth and atte[illegible] During lambing and farrowing [illegible] many good managers will check [illegible] animals every few hours during bo[illegible] and night Brooders will improve [illegible] warmth and dryness in the pens an[illegible] vent chilling Special care at birth [illegible] pay big dividends.

TO ORDER TREES AND SHRUBBERY The mon[illegible] March and April are good times to plant most any k[illegible] a tree or shrub; early planting is important to take [illegible] tage of spring rains and to get maximum root growt[illegible] fore hot, dry weather comes.

TO TOPDRESS WINTER WHEAT· Wheat fields that [illegible] bit thin, or got off to a late start last fall, will respo[illegible] nitrogen applications this spring Also, wheat grow[illegible] sandy, gravel, or shale soils may need extra nitroge[illegible] best results In these cases an application of 30 to 40 p[illegible] per acre of straight nitrogen fertilizer made when [illegible] starts in the spring should give good results However [illegible] heavier, fertile soils following tobacco or potatoes is [illegible] recommended because this nitrogen will cause very [illegible] growth and lodging will be a problem Also, if the [illegible] is to be seeded down to clover or alfalfa, nitrogen fe[illegible] er is not recommended.

TO CHECK THAT CORN PLANTER· Now is a good [illegible] to check all farm machinery, especially the fertili[illegible] tachment on that corn planter. If you have a so[illegible] corn planter be sure the fertilizer divider has not [illegible] away; this may cause the fertilizer and the seed to [illegible] together and injure the stand Side band applications [illegible] tilizer with the corn planter are strongly recommende[illegible] most equipment dealers can supply them for the a[illegible] corn planter. Both nitrogen and potash fertilizers will [illegible] most seeds; be sure your fertilizer helps, rather than [illegible] ders, your corn crop this summer.

● 4-H Week

(From Page 1)

tion as wel' as interesting, worthwhile work. Character development and good citizenship are their most significant goals

Of the members in the county, 864 were enrolled in 46 Home Economics Clubs and 875 were enrolled in 22 Agriculture clubs. A total of 182 local club leaders volunteered their services to the young people.

By far the largest agriculture club in the county was dairying with a membership of 143 enrolled In second place was the baby beef club with a membership of 115. The swine club's 79 enrollees were in fourth place following the 82 members of the flower club, but 69 of the swine clubbers completed their projects while only 44 of those in the flower club finished Poultry club numbers were next in line with 75 entrants. Other clubs ranged from that number down to three each in the potato and soil and water conservation clubs.

In the Home Economics division, clothing and food projects were by far the most popular. Clothing clubs had a total of 538 members locally while 225 members enrolled in food clubs. The other 100 members are enrolled in all the other home economics clubs

Nationally, 4-H Club Week will be highlighted in Washington, D. C., by six previously selected members who will present the annual 4-H "Report to the Nation" The report will summarize in story and pictures outstanding 4-H accomplishments and current projects. The three girls and three boys, while in the Nations Capital, expect to review the report with President Eisenhower at the White House. They also plan to visit Secretary of Agriculture Ezra Taft Benson, C M Ferguson, administrator of the Federal Extension Service, and various Senators and members of Congress on Capitol Hill.

4-H'ers everywhere will share honors with the 296,000 adult volunteer leaders who guide 4-H work in local communities throughout the 50 States and Puerto Rico. The main purposes of 4-H Club Week are. To acquaint more young people with opportunities available to them through joining or forming 4-H clubs, to assist new members in starting projects in farming, homemaking, community service, and other activities; and to inform the public about 4-H aims and methods.

4-H Club Work locally is under the direction of the Lancaster County Agricultural Extension Service in Cooperation with the Pennsylvania State University and the United States Department of Agriculture.

County Farmers Advised To Get Wheat Quotas

Any farmer who has seeded wheat for harvest as grain next summer but who does not have a wheat allotment or a feed wheat exemption should notify the county Agricultural Stabilization and Conservation office of his estimated acreage, Landis G. Becker of the Lancaster Co office said recently In this way, county records can be established and steps can be taken to make such a farmer eligible for a wheat marketing card if he decides to sell any of his grain

Under the wheat marketing quota program, any grower who produces more than 15 acres of wheat is subject to a penalty on any "excess" wheat harvested Tne penalty must be paid before the wheat is eligible for marketing

Farmers Assn. To Tour D.C.

A delegation of five farm people from Lancaster County will be in the Nation's Capitol this month to meet with Congressman Paul B Dague

Under the sponsorship of The Pennsylvania Farmers' Association, the local group will join with the delegations from 40 other County Farmers Associations in the State

Congressman Dague will be the guest of the local delegation at a dinner meeting in the Washington Hotel on the evening of March 7

In announcing the Washington trip, County Farmers' Association President, J. Roy Greider said that the trip has a double barreled purpose

1 "It gives farmers a chance to see how politics are played, and it shows us how politics affects our net income

2 "It provides the Congressmen an opportunity to gain first-hand information as to how farmers feel about several legislative issues."

Those chosen to represent the Lancaster County Farmers' Association at the Washington meeting are

Arnuv Reist, 1050 Eden Road, Lancaster; Herman Shirk R D 2, Quarryville, H Raymond Stoner, 1051 Eden Road, Lancaster, and Mr and Mrs. J Roy Greider of Mount Joy R D 1

Insecticide In Fertilizer Is Problem

Timing the application is the big problem in using insecticides in fertilizer, according to Lloyd E. Adams, Extension Entomologist at the Pennsylvania State University. Adams spoke during the annual Lime and Fertilizer Conference recently at Penn State.

Insecticide timing must coincide with fertilizer application where the two are combined, Adams said. The conference took place as thousands of farmers in the State made annual plans for fertilizer use this spring and summer.

He said that most insecticide-fertilizer mixes used in Pennsylvania are designed for individual farmers — "a

Peanuts and Peanut Butter

by Mrs. Richard C. Spence

March 6 to 12 is being observed as National Peanut Week so we are going to help you celebrate this week in full fashion with some recipes using peanuts or peanut butter.

Peanuts belong to the pea-and-bean family, the legumes —they aren't really nuts at all. But like nuts, they're always popular in salads and sandwiches, cookies, and desserts—as well as just plain salted And like peas and beans, peanuts are good in main dishes, in soups, and in combination with other vegetables

Peanuts are exceptionally high in niacin, are important also for other B vitamins. Among the vegetable foods, peanuts rate high in quantity of protein For effecient use of peanut protein, some high-quality protein food such as meat, eggs, or milk should be eaten at the same meal The high fat content of peanuts makes them a good source of food energy

Some main dishes using peanuts—

PEANUT- STUFFED PEPPERS

4 green peppers
1 tablespoon melted butter or margarine
⅓ cup uncooked rice
3 tablespoons finely chopped onion
¼ cup chopped celery
1 teaspoon salt
1 cup water
1⅓ cups cooked or canned tomatoes
⅔ cup chopped salted peanuts
¼ cup fine crums mixed with 1 tablespoon melted butter or margarine

Cut out stem ends of the peppers and take out the seeds. Cook peppers five minutes in boiling saltel water. Combine butter or margarine, rice, onion, celery, and salt in a fry pan. Add water slowly as the mixture begins to cook, and simmer covered 5 to 10 minutes. Add tomatoes and simmer 10 minutes longer or until rice is almost done. Add more liquid if needed. Stir in peanuts, stuff peppers with the mixture, and sprinkle with crumbs Place peppers in a baking pan with a little hot water and bake at 350 degrees 30 to 40 minutes.

* * *

PEANUT - MEAT LOAF

1½cups ground beef (¾ pound)
2 tablespoons finely chopped onion
½ teaspoon powdered dry mustard
½ teaspoon Worcestershire sauce, if desired
1 teaspoon salt
1 cup finely chopped salted peanuts
¾ cup fine crumbs
1 egg
½ cup milk
1 tablespoon tomato catsup

Mix ingredients lightly. Bake in a greased loaf pan at 350 degrees about 1 hour. Serve with tomato sauce. 6 servings.

* * *

PEANUT BUTTER FRENCH TOAST

½ cup peanut butter
¼ cup Honey
¼ teaspoon salt
8 slices bread
2 eggs, beaten
1½ cup milk
2 tablespoons butter or margarine

Blend peanut butter, honey and salt Place about 2½ tablespoons peanut butter-honey mixture between two slices of bread to make a sandwich. Combine egg and milk. Soak sandwiches in egg mixture. Melt butter or margarine in a baking pan or fry pan. Bake sandwiches at 400 degrees about 40 minutes. Turn sandwiches to brown both sides. Or cook slowly in fry pan on top of range.

* * *

Peanuts and vegetables —

CREAMED CELERY AND PEANUTS

1½ cups celery cut in 1-inch lengths
¾ cup liquid (cooking liquid plus milk)
1 tablespoon flour
¼ teaspoon salt
Pepper
1 tablespoon butter or margarine
¼ cup grated cheese, if desired
¼ cup chopped salted peanuts

Cook celery until tender in a small amount of boiling salted water Drain Measure cooking liquid and add enough milk to make ¾ cup Mix flour and part of liquid until smooth. Stir into rest of liquid. Add seasonings and butter or margarine; cook slowly until the sauce is thickened, stirring frequently. Stir the celery and cheese into the sauce As soon as cheese is melted, remove from heat Add peanuts

* * *

SWEETPOTATO AND PEANUT CROQUETTES

2 cups mashed sweetpotatoes
2 cups finely ground peanuts
2 eggs, well beaten
1 teaspoon salt
2 tablespoons flour
Bread crumbs
1 egg diluted with 2 tablespoons milk

Combine the first 6 ingredients; shape mixture into croquettes. Roll them in bread crumbs, diluted egg and again in crumbs. Fry in hot deep fat (380 degrees) until a golden brown. Drain on absorbent paper. Serves 10

* * *

PEANUT AND CARROT SALAD

2 cups grated carrots
1 cup ground peanuts
1 tablespoon grated onion
½ teaspoon salt
½ cup mayonnoise
Lettuce
1 tomato cut into thin wedges

Combine carrots, peanuts, onion, salt and mayonnaise Mix lightly and serve on crisp lettuce Garnish with tomato wedges Serves 6

* *

⅓ cup sugar
1 small orange
1 small tart apple
¼ cup chopped salted peanuts
¼ teaspoon salt

Put cranberries through d chopper, using the urse plate, and mix with sugar. Cut the orange and ple into quarters, remove ds, and put through chopr. Combine all ingredients. rve with poultry or meat. kes about 1½ cups.

Bread and cakes are delicus with peanut flavor—

PEANUT BUTTER DROP COOKIES

½ cup peanut-butter
1 cup brown sugar
2 eggs, beaten
2 tablespoons milk
2½ cups cake flour
1 teaspoon baking powder
½ teaspoon ginger
¼ teaspoon cloves
½ teaspoon cinnamon
1 teaspoon soda
1 cup chopped dates or raisins

Cream peanut butter with ted sugar, add eggs and lk Sift dry ingredients toher and add. Add fruit and drop by teaspoons onto greased cookie sheet. Bake in a moderate oven (350 degrees) 10 minutes. Makes 4 dozen cookies. Without the fruit this cookie can be molded with a cookie press and baked on a cold ungreased cookie sheet as above.

* * *

PEANUT - BUTTER NUT BREAD

Topping
2 tablespoons butter
4 tablespoons brown sugar
Peanuts
1 tablespoon water
Batter
1 egg
1 cup brown sugar
2 tablespoons peanut butter
2 tablespoons melted butter
1 cup sour milk or butter milk
2 cups sifted enriched flour
½ teaspoon soda
1 teaspoon baking powder
½ teaspoon salt

For topping; spread butter on bottom of loaf pan Cover evenly with sugar and peanuts Sprinkle water over mixture. Cover with batter.

To make batter beat the egg. Add sugar gradually, beating it in. Stir in peanut butter and melted butter. Add milk. Sift together flour, soda, baking powder and salt. Add egg mixture, stirring until well-blended. Bake in moderate oven 350 degrees for 1 hour. Makes one 1-pound loaf.

* * *

EGG YOLKS ARE A GOOD SOURCE OF IRON FOR BABIES

Baby's first solid feed needs to contain iron, and egg yolks seem to be one good way to supply it. You can hard cook the eggs, then mash and mix the yolk with some of the formula. Or make a soft custard with one egg yolk and from ¼ to ⅓ cup of milk.

One egg yolk will give a large share of the iron a child needs daily and also some thiamine and vitamin A.

The egg white isn't given to infants because it may produce as allergy unless every particle of the white is thoroughly cooked.

Sieved meats and cereals especially prepared for infant feeding will also supply some of the iron the baby needs each day These special cereals usually have iron added to them. Baby cereals with oatmeal in them provide much more thiamine than other cereals

Usually the cereals are mixed with four to five volumes of warm milk when they are fed to the baby Milk makes little contribution of iron but is most valuable for its calcium content

Tree Planting On Increase

An all-time high of over 2 billion trees were planted in 1959 largely as a result of the tremenoous increase in planting on private lands, Secretary of Agriculture Ezra Taft Benson announced.

The Forest Service summary of reports from its field offices, State foresters and other Federal departments shows 2,118,471 acres were planted.

One-third of the land planted, or about 700,000 acres, was cropland placed in the Conservation reserve program under 10-year contracts Under the Conservation Reserve, farmers receive cost-sharing help to place in conservation uses land voluntarily retired from crop production.

During the past two years forest and wind barrier tree planting has leaped from 1 million acres in 1957 to 1½ million in 1958, and 2-1 million in 1959. This compares to 497,507 acres planted in 1950 and 812,588 acres in 1955

Tree planting on privately owned land jumped from 1,326,370 acres in 1958 to 1,884,071 in 1959. Planting on

Plowing Meet Date, Place Announced

Harrisburg, March 3—The State Plowing Contest and Conservation Field Day will be held August 10 at the Frank Bice farm, five miles west of Chambersburg, in Franklin County, David G. Unger, chairman of the State Plowing Contest Committee and director of the State Soil Conservation Commission, announced today.

Feature of the Conservation field day will be a demonstration of an alfalfa pelleting machine. Diversion terracts, a farm pond, open and tile drains will be installed in a massive demonstration of conservation and water control practices.

Cooperating in staging of events will be the Franklin County Soil Conservation District, Chambersburg Chamber of Commerce, Agricultural Extension Service, Soil Conservation Service, Agricultura Conservation and Stabilization Committee, and farm machinery dealers

County plowing contests will be held throughout the summer with regional contests planned if needed Both level land and contour events are scheduled for the state contest

The national plowing contest will be held this year in South Dakota

● Soil Conservation

(From Page 1)

ink agriculture should be exempted from any legislation concerning water use," Dr Dorrilow said, "But farmers must be ruled by the same laws governing industry if they hope to have the same priveleges." At the pre sc it time there is no law g verning the use of water f om streams except the old Riparian Law which says that water removed from a stream must be replaced in the same amount and condition. "This is obviously impossible with water used for irrigation," he said

In other talks, Miss Verna W Weaver, teacher in the Manheim Central School District told of her experiences at the Conservation Laboratory at Pennsylvania State University, and thanked the district for making it possible for her to attend the laboratory.

Robert Fahenstock of the Manheim FFA Chapter presented the speech, "From the Dust of the Earth", with which he won second place in the Soil Conservation Public Speaking contest at State FFA Week.

Certificates of merit were presented to ten countains for service in the cause of soil conservation during the year. Heading the list was Martin Greider, Lancaster R2, last year's "Outstanding Conservation Farmer."

Others included Miss Verna Weaver, Manheim Central teacher; Robert Fahenstock, Manheim FFA member; Pequea Valley FFA Chapter; Henry Givler, Pequea Valley FFA adviser; Charles Pearce, former county commissioner; Herbert Wiggins, Millersville R1; Vernon Klein, Denver; Willis Bucher, Lititz; J R. Snyder Mount Joy and Jack Keyser, Lancaster

Amos H. Funk, Millersville R1, district chairman was toastmaster Over 250 attended the meeting in the Blue Ball Fire Hall.

Cows Sell At Farm Auction

Many of the farm sales during the latter part of the week were postponed until a later date because of bad weather.

At a farm sale early in the week cows ranged from $250 to $352 while fresh heifers brought $170 to 215 and five small heifers sold up to $120. Two bulls sold for $258 and 385.

At the same sale a Farmall H brought $915 while a Farmall A went to $560

Cultivators for the tractor brought $154 and the plow $110. Other equipment and prices were manure spreader, $298; elevator, $105; spring harrow,$72; and tobacco ladders, $48.

Edgar Funk and Frank Groff, were the auctioneers

● Tree Planting

(From page 9

other public lands decreased slightly

"We're delighted to see an increased interest in tree planting, particularly by private landowners," Secretary Benson said, "because we have a lot of idle forest lands to get into full production if we are to have the forest products needed in the future We can't be complacent, however, about the 1959 record. Not all the newly planted acres will develop into productive forests. Some will be lost prematurely through changing land uses

New Pesticide Equipment Is Needed Says Research Group

Improved equipment and methods for applying pesticides to farm crops is needed in some areas, the U. S. Department of Agriculture's Farm Equipment and Structures Research Advisory Committee indicated at its annual meeting, recently. The meeting was held this year at Stonesville, Miss

There is evidence that failure of some commonly- recommended pesticides to give satisfactory control may be due to a lack of accurate knowledge of the best methods of application, according to the committee, and strengthened research is needed to develop new information

In the area of livestock production and management, studies to obtain new knowledge of the influence of environment on farm animals and poultry are the top need in the committee's opinion Growth, health, fertility, production, and feed consumption are all influenced by animal's ability to dissipate or conserve heat which is influenced by environment, was pointed out.

Engineering and economic research to uncover new principles for improvement of farm layouts, building design and arrangement, electric and mechanized equipment, and controls for automatic systems is also an important present need, the committee said.

Expanded studies on the water requirements of modern farmsteads and waste disposal methods is needed to help farmers, extension workers, equipment makers and public authorities, according to the committee

The committee also calls for new engineering and statistical research into the nature, causes, and extent of farm accidents in order to develop methods and devices for reducing them.

Swine Show

(From rage 1)

Abrogast and Bastian, on a bid of $25 per hundredweight. The reserve entry with its two pen mates captured the reserve title in the pen of three competition.

Millarden farms, Annville, showed a pen of 10 Hampshires to the championship in that division beating out the 10 Yorkshires exhibited by John J. Hess II, Intercourse

In addition to Stuber and Masonic Home Farms, three other exhibitors won both individual and trio breed honors. They were Russell Sauder, Manheim R3, Landrace; John Hastings, Kirkwood, Chester White; and George Cogley, Ronks R1, Yorkshires.

Judge Howard White, director of Livestock Procurement for Abrogast and Bastian, placed the blue ribbon on the following entries:

Spotted Poland China

Lightweight barrows - Omar Beam, Elverson R1; Heavyweight - Clair Hartman, Gratz.

Trios - lightweight, John J. Hess II, Intercourse; heavyweight - Hartman.

Landrace

Lightweight barrows - James Z. Martin, East Earl R1 heavyweight, Russell Sauder Manheim R3.

Trios - lightweight, Galen McQuate, Florin; heavyweight, Sauder.

Duroc Jersey

Lightweight barrows - Masonic Home Farms, Elizabethtown; heavyweight - Robert Strickland, Bainbridge R1.

Trios - lightweight - Masonic Home Farms; heavyweight - Masonic Home Farms.

Hampshire

Light weight barrows - John Struber, Denver; heavyweight - Millarden Farms, Annville.

RONALD HARRISON, HERDSMAN for John Stuber, Denver, shows the Grand Champion barrow at the second annual Swine Breeders Assn show and sale of market hogs at the Lancaster Union Stock Yards on Tuesday. The 205 pound Hampshire sold during the afternoon for $41.00 per hundredweight

Trios - lightweight - Stuber; heavyweight - Millarden Farms.

Berkshire

Lightweight barrows - Norman Kolb, 335 Pitney Rd; heavyweight - Masonic Home Farms

Trios - heavyweight -Masonic Home Farms.

Chester White

Lightweight barrows - John Hastings, Kirkwood, heavyweight, John Hastings

Yorkshires

Lightweight barrows - George Cogley, Ronks R1; heavyweight - John W. Eby and son, Gordonville.

Trios - lightweight - Cogley, heavyweight - Eby.

Pen of 10

Lightweight - Millarden Farms (Hampshires)

Heavyweight - McQuate, (Yorkshires).

Prizes for the show were made possible through donations by the following firms: Miller and Bushong, of Rohrerstown; John W. Eshleman, of Lancaster; Beacon Milling Co, Lancaster; Allied Mills, Lancaster; Farm Bureau Cooperative; John J Hoober, Gordonville; John J. Hess II, Intercourse; Hempfield Mills, of Manheim; Paul H. Gehman, Denver; F. W. Fisher for Dr Salsbury, Inc; Blue Ball National Bank; Eastern States Cooperative, Lancaster.

Manager of the sale was William Bixler, secretary of the Lancaster Livestock Exchange. Auctioneer was Abe Diffenbach.

DHIA
(From page 1)

Kreider, Quarryville R1, succeeded Robert Groff, Quarryville R3, as secretary of the group Elections were held at the Farm Bureau Auditorium on Monday evening

Treasurer, Charles Long reported that the association handled over $90,000 last year. The officers of the organization along with Victor Plasto, Associate County Agent were instructed to investigate the possibilities of installing a ledger system of bookkeeping for the association.

Herbert Gilmore, State Supervisor of the Dairy Herd Improvement Associations told members that Lancaster County with its approximately 400 DHIA members and 175 Owner Sampler members is by far the largest association in the state. "And of course Lancaster County has the largest board of directors". he said

In other business, the directors voted to give full voting rights to the various breed representatives Breed association members may also make motions from the floor, but they may not hold office on the board.

Insecticide
(From page 7)

costly procedure." For the most part, insecticide-fertilizer combinations in the State are used on potato ground for wire worm control The next largest amount is for grub control on turf.

Adams said the best method for combining insecticide and fertilizer, although costly, is to impregnate fertilizer granules with the insecticide. Another method is to mix the two in liquid form — a process requiring special formulations.

Baby Beef Club Elects Foreman

Glenn Foreman, Pennsylvania's two-time baby beef champion was elected president of the Red Rose Baby Beef and Lamb Club Wednesday night at the Brecht school, Lititz Pike, Lancaster.

Foreman, the Manheim R3 showman and varsity wrestler at Manheim Central High School, succeeds Darvin Boyd, Ephrata R1, who was elected game leader for the group.

Other officers elected at the Wednesday night meeting were Marlin Cassel, of Manheim R1, vice president; Nancy Landis, Strasburg R1 secretary; Jean Miller, Elizabethtown R1, assistant sectary; and Wilbur Hosler, Manheim R3, treasurer.

Other officers include Janet Frey and J. David Lapp, song leaders; Darvin Boyd and Mary Jane Herr, game leaders, and John Good and Judy Nolt, news reporters.

Club leaders chosen were Mylin Good, Manheim R1 Elvin Hess, Strasburg R1; Fred Linton, Quarryville R2 Victor Longenecker, Elizabethtown R3; A. R. Nissley, Manheim R4, and Harry Showalter, Reinholds R1.

Experience is the difference between keeping your chin up or sticking it out.

● County Council

(From page 1)

take one or more projects throughout a year, raising their projects by themselves. Each project is completed by a roundup at the end of the season. At the round up the members receive awards for outstanding work.

The activities of the county 4-H are controlled by the county council. At present the council is composed of 16 members, eight from home making clubs and eight from the agricultural clubs. With the members coming from all sections of the county, the council meets once a month to plan the many activities enjoyed by the 4-H'ers and their friends.

County wide activities of the past year were as follows: 4-H Field day at Long Park in July; a combined square dance and Halloween Party in October; Rollerskating party in November; 4-H play, titled "Father Knows Best" in the Hempfield School in November; combined square dance and Christmas party in December; rollerskating party in January and the annual leaders banquet in Mount Joy in February.

Included in the planned activities are a roller skating party on March 16, a Spring Jamboree to encourage all 4-H'ers to invite their friends to join 4-H and make it another wonderful year of learning, living and serving.

The council members, who are guided by the home economics and agriculture extension leaders, will conclude their successful year of experiences and new adventures this spring when a date will be set for the officers training meeting. At that time new council will be elected.

We wish "lots of luck" to the new council and 4-H members.

STOP PAINT DAMAGE

A common cause of blistering, scalding, or peeling paint is moisture, according to Penn State extension agricultural engineers. Interior moisture is worse than that from outside. The engineers say that this moisture can be prevented from entering the wall by using a vapor barrier on the inside wall

Now is the ideal time to apply **New Jersey Green Sand** and **Calphos** to grain and hay fields. If interested in natural program of farming it will pay you to investigate and use these natural colloidal marine deposits.

1960 EARLY BIRD REPLACEMENT PROGRAM

★ **ECONOMY OF PROGRAM**

Basis present feed costs you can grow Leghorn pullets to 20 weeks of age on a feed cost of 75 cents or LESS.

On the EARLY BIRD PROGRAM it takes about 19 pounds of feed or less to grow a Leghorn pullet to 20 weeks.

1. The Early Bird feed required on growing the 1958 Random Sample pullets for the Pennsylvania Egg Laying Contest was 19.1 pounds.
2. On the 1959 State contest pullets, feed required was 19.0 pounds.
3. On the Claude Hess Farm, R. D. #2, Ephrata: 5,000 pullets were grown in 1959, on 18.9 pounds of feed.
4. Mr. Walter Ames of Narvon, Penna., raised 2,000 exceptionally fine pullets to 20 weeks of age on 17.32 pounds of feed.

★ **ESTIMATE OF FEED REQUIRED**

This 19 pounds of feed consists of approximately the following quantities.

★ **CONFINEMENT PROGRAM**

Early Bird Starter	2.0 pounds
Early Bird Grower	8.5 pounds
Oats	8.5 pounds
	19 pounds

★ **RANGE PROGRAM**

Early Bird Starter	2.0 pounds
Early Bird Growing Mash	6.8 pounds
Oats	10.2 pounds
	19 pounds

At present costs for feed in ton lots, this gives a feed cost per pullet of 75 cents using bagged feed.

SOME OF OUR CUSTOMERS HAVE GROWN PULLETS FOR AS LOW AS 65 CENTS FEED COSTS AT 20 TO 21 WEEKS OF AGE.

★ **MANAGEMENT & DISEASE CONTROL PROGRAM**

For details see our booklet on Management, available on request.

HAVE YOU WATCHED PULLET PLACEMENT FIGURES LATELY?

They are substantially lower all over the nation.

Perhaps it is better to start your replacements NOW rather than wait until everyone jumps on the bandwagon. If we can be helpful, please contact us.

"The Way The Twig Is Bent....!"

Remember:

Your FUTURE egg production costs and your flocks PERFORMANCE will be determined by the way you feed and manage your replacement stock NOW.

Don't be penny wise and pound foolish! Do it right!
